

Mata Kuliah : Pemrograman Web Lanjut (PWL)
Program Studi : D4 – Teknik Informatika
Semester : 4

Kelas : 2A
NIM : 244107020030
Nama : Athaulla Hafizh
Jobsheet Ke- : 5

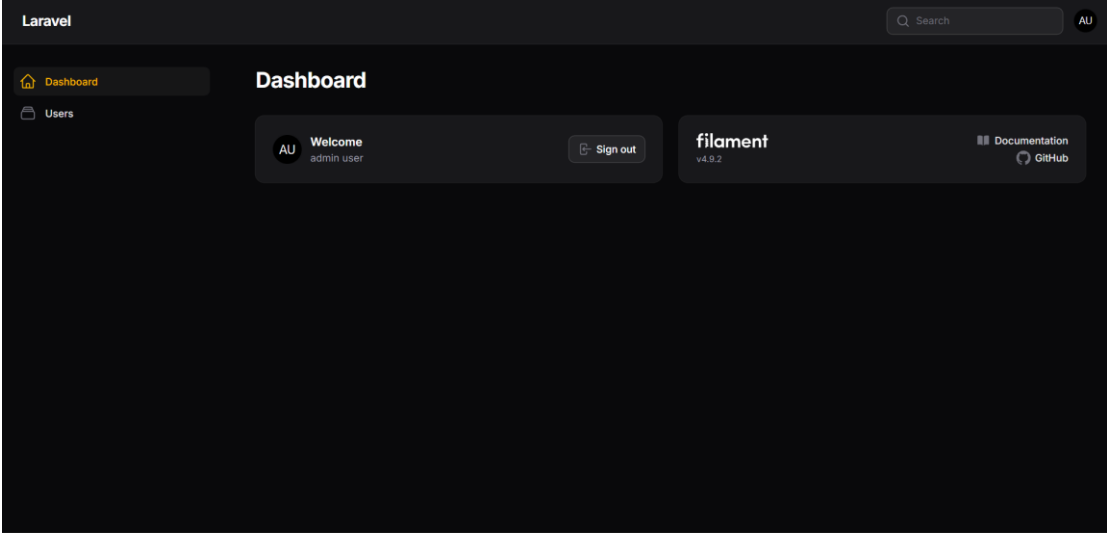

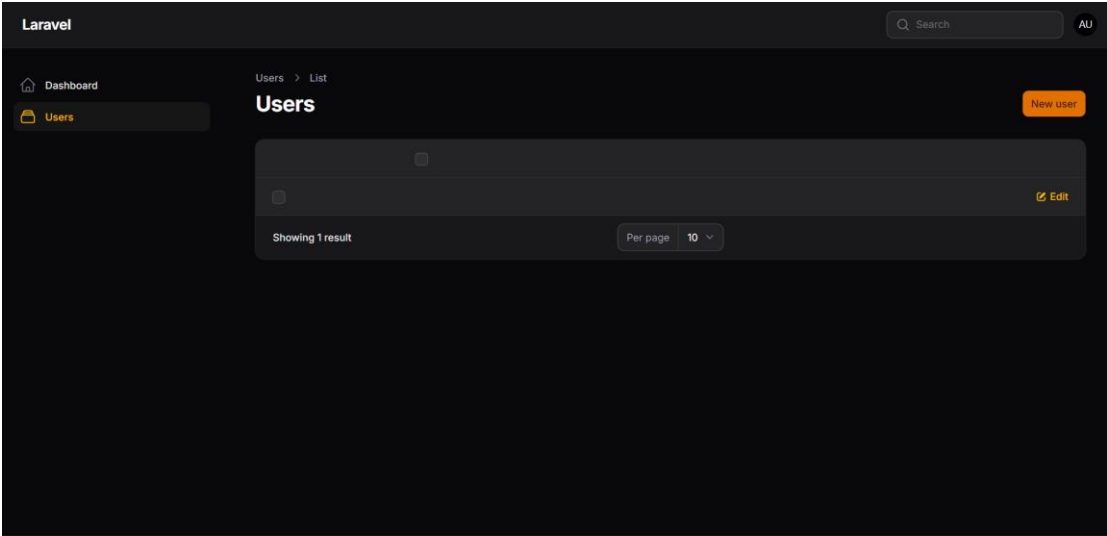

Laporan Jobsheet 05 - 02

Link Repository : <https://github.com/athfizh/Pemrograman-Web-Lanjut>

Praktikum

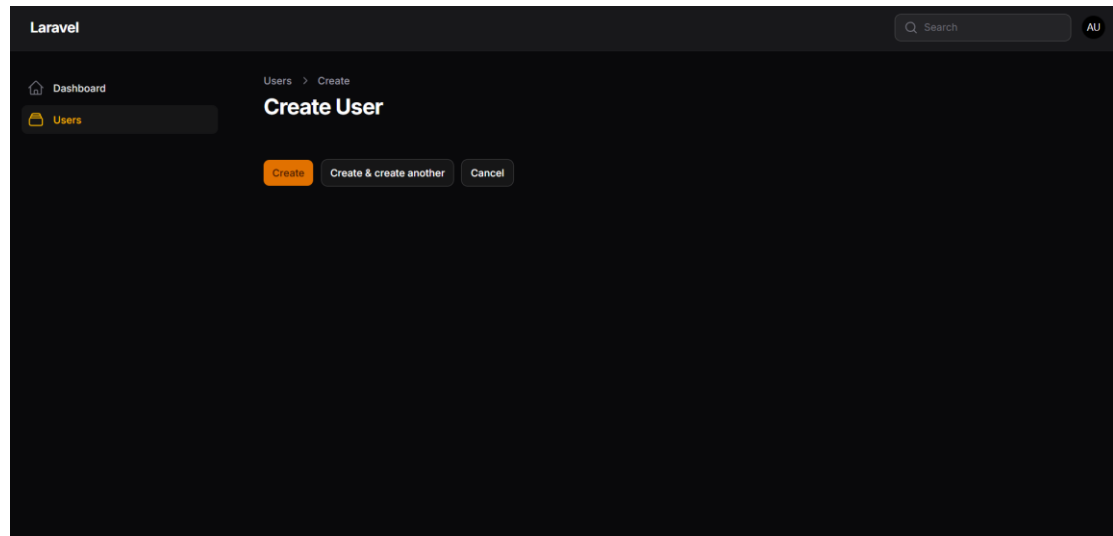

Langkah	Jawaban/Deskripsi
1	Melihat Daftar Perintah Filament <pre>PS C:\laragon\www\Pemrograman-Web-Lanjut\jobsheet5\filament-app> php artisan list Laravel Framework 13.2.0 Usage: command [options] [arguments] Options: -h, --help Display help for the given command. When no command is given display help for the list command --silent Do not output any message -q, --quiet Only errors are displayed. All other output is suppressed -V, --version Display this application version --ansi --no-ansi Force (or disable --no-ansi) ANSI output -n, --no-interaction Do not ask any interactive question --env[=ENV] The environment the command should run under -v vv vvv, --verbose Increase the verbosity of messages: 1 for normal output, 2 for more verbose output and 3 for debug Available commands: about Display basic information about your application</pre> Daftar perintah baru sudah ada dalam list tersebut.
2	Membuat Resource User

	<pre>PS C:\laragon\www\Pemrograman-Web-Lanjut\jobsheet5\filament-app> php artisan make:filament-resource User The "title attribute" is used to label each record in the UI. You can leave this blank if records do not have a title. What is the title attribute for this model? > name Would you like to generate a read-only view page for the resource? (yes/no) [no] > no Should the configuration be generated from the current database columns? (yes/no) [no] > no INFO Filament resource [App\Filament\Resources\Users\UserResource] created successfully.</pre>
3	Menjalankan Aplikasi Sekarang akan muncul menu Users di sidebar.  Jika diklik user pada sidebar 

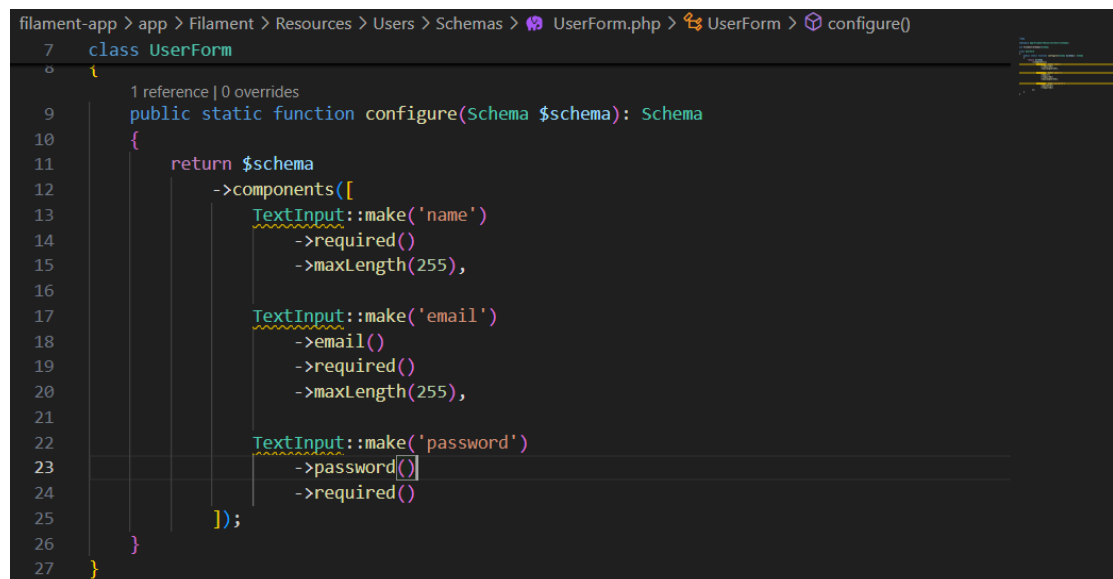

Jika diklik new user (blm ada form inputnya)

4

Modifikasi dan tambahkan field berikut:

Hasil:

Laravel

Search AU

Dashboard Users

Users > Create

Create User

Name* Email*

Password*

Create Create & create another Cancel

Laravel

Search AU

Dashboard Users

Users > Teknisi Satu > Edit

Edit Teknisi Satu

Name* Email*

Technisi Satu teknisi1@gmail.com

Password*

Delete

phpMyAdmin

Server: localhost:3306 • Database: blancod2026 • Table: users

Showing rows 0 - 1 (2 total, Query took 0.0013 seconds)

SELECT * FROM `users`

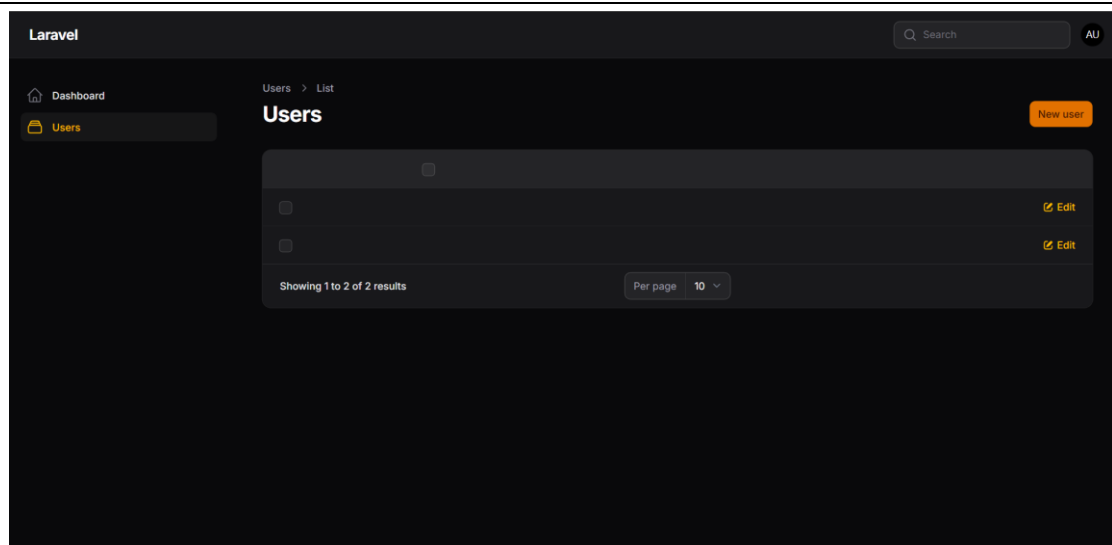

Profiling | Edit inline | Edit | Explain SQL | Create PHP code | Refresh

Show all | Number of rows: 25 | Filter rows: Search this table | Sort by key: None

	id	name	email	email_verified_at	password	remember_token	created_at	updated_at
☐	1	admin user	admin@gmail.com	NULL	\$2y\$12\$wXn4DxT7b8s7yrMkbA7Zje2OwDnQIF4qBzjgMDXAIY...	NULL	2026-03-30 03:55:16	2026-03-30 03:55:16
☐	2	Teknisi Satu	teknisi1@gmail.com	NULL	\$2y\$12\$MvdrAwxB1DKXh4sGrvNvOrKS0SmLgmtdLh85WIA6...	NULL	2026-03-30 17:06:12	2026-03-30 17:07:42

Query results operations

Print Copy to clipboard Export Display chart Create view

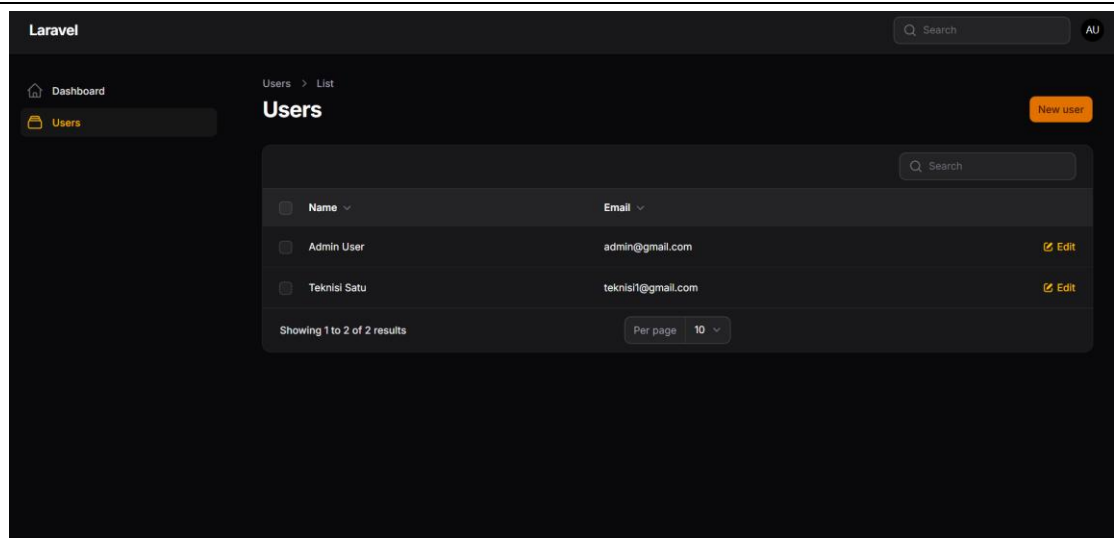

5 Menampilkan Data pada Tabel

Menambahkan kolom:

```
filament-app > app > Filament > Resources > Users > Tables > UsersTable.php > UsersTable > configure()
11 class UsersTable
12 {
13     1 reference | 0 overrides
14     public static function configure(Table $table): Table
15     {
16         return $table
17             ->columns([
18                 //
19                 TableColumn::make('name')
20                     ->searchable()
21                     ->sortable(),
22                 TableColumn::make('email')
23                     ->searchable()
24                     ->sortable(),
25             ])
26             ->filters([
27                 //
28             ])
29             ->recordActions([
30                 EditAction::make(),
31             ])
32             ->toolbarActions([
33                 BulkActionGroup::make([
34                     DeleteBulkAction::make(),
35                 ]),
36             ])
37     }
38 }
```

Hasil:

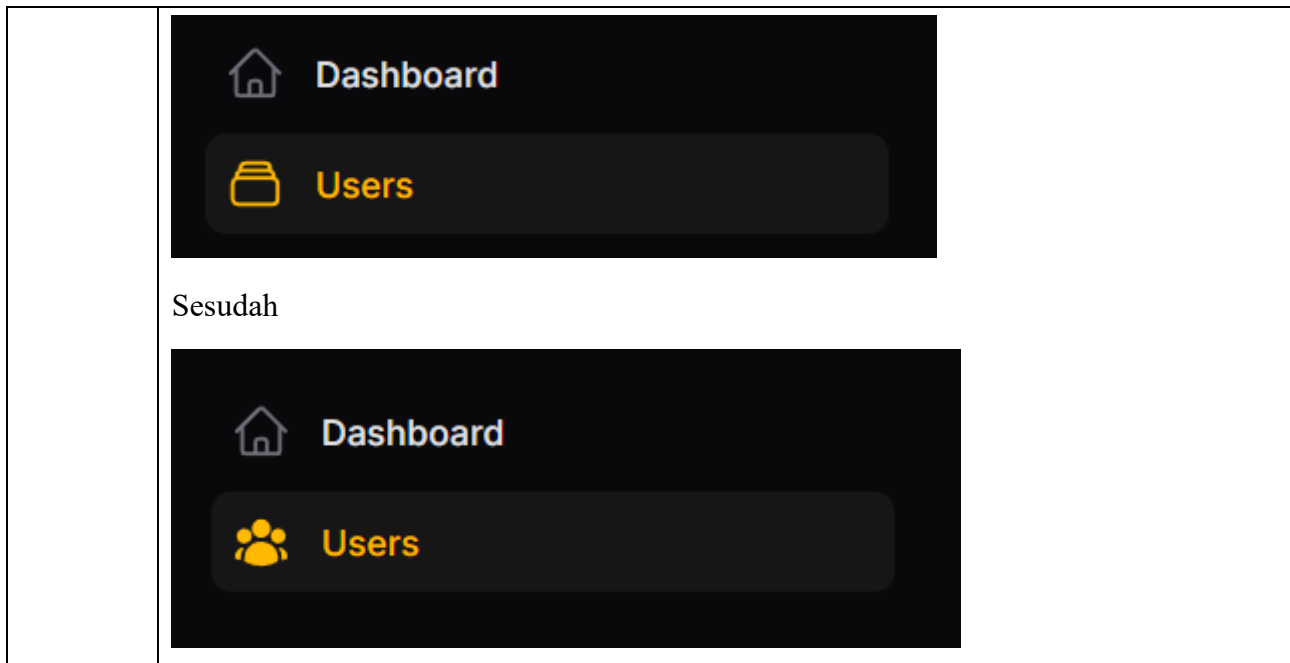

6 Mengganti Icon Menu Resource

Ubah property icon:

```
filament-app > app > Filament > Resources > Users > UserResource.php > UserResource
12 use Filament\Resources\Resource;
13 use Filament\Schemas\Schema;
14 use Filament\Support\Icons\Heroicon;
15 use Filament\Tables\Table;
16
6 references | 0 implementations
17 class UserResource extends Resource
18 {
19     0 references
20     protected static ?string $model = User::class;
21
22     //protected static string|BackedEnum|null $navigationIcon = Heroicon::OutlinedRectang
23     0 references
24     protected static string|BackedEnum|null $navigationIcon = Heroicon::UserGroup;
25
26     0 references
27     protected static ?string $recordTitleAttribute = 'name';
28
29     0 references | 0 overrides
30     public static function form(Schema $schema): Schema
31     {
32         return UserForm::configure($schema);
33     }
34 }
```

Hasil:

Sebelum

Pertanyaan

1. Mengapa Filament dapat membuat CRUD tanpa banyak coding?

Filament menggunakan sistem *Resource* yang terintegrasi erat dengan Model Eloquent di Laravel. Melalui satu perintah Artisan, Filament otomatis men- *generate* komponen *backend* (logika *database*) dan *frontend* (UI halaman List, Create, Edit) secara bersamaan, sehingga developer hanya perlu mengatur skema tampilannya saja.

2. Apa perbedaan Form Schema dan Table Schema?

- **Form Schema:** Berfungsi untuk membangun dan mengatur input field (seperti teks, *dropdown*) pada halaman saat user menambah (*Create*) atau mengubah (*Edit*) data.
- **Table Schema:** Berfungsi untuk mengatur susunan kolom, fitur pencarian, dan pengurutan data saat ditampilkan dalam bentuk daftar tabel pada halaman utama (*List*).

3. Bagaimana jika kita ingin menambahkan validasi email unik?

Cukup tambahkan *method chaining* ->unique() pada kolom input email di dalam Form Schema. Agar sistem tidak *error* saat melakukan proses edit data (karena mendeteksi emailnya sendiri), gunakan penulisan spesifik: ->unique(ignoreRecord: true).

4. Mengapa password tidak perlu kita hash manual?

Pada versi terbaru Laravel dan Filament, proses *hashing* (enkripsi) password ditangani secara otomatis di belakang layar. Ketika kita menggunakan komponen `->password()` pada Form Schema, Filament akan memanfaatkan sistem *Model Casts* bawaan Laravel untuk langsung mengenkripsi inputan teks sebelum menyimpannya ke database.

Tugas Praktikum

1. Email dan Password

```
filament-app > app > Filament > Resources > Users > Schemas > UserForm.php > ...
1  <?php
2
3  namespace App\Filament\Resources\Users\Schemas;
4
5  use App\Models\User;
6  use Filament\Schemas\Schema;
7  use Filament\Forms\Components\TextInput;
8  use Illuminate\Validation\Rules\Password;
9
10 2 references | 0 implementations
11 class UserForm
12 {
13     1 reference | 0 overrides
14     public static function configure(Schema $schema): Schema
15     {
16         $record = $schema->getLivewire()->getRecord();
17
18         return $schema
19             ->components([
20                 TextInput::make('name')
21                     ->required()
22                     ->maxLength(255),
23                 TextInput::make('email')
24                     ->email()
```

2. Kolom baru

```
filament-app > app > Filament > Resources > Users > Tables > UsersTable.php > UsersTable > configure()
11 class UsersTable
    1 reference | 0 overrides
13 public static function configure(Table $table): Table
14 {
15     return $table
16         ->columns([
17             //
18             TableColumn::make('name')
19                 ->searchable()
20                 ->sortable(),
21             TableColumn::make('email')
22                 ->searchable()
23                 ->sortable(),
24             TableColumn::make('created_at')
25                 ->dateTime('d M Y, H:i')
26                 ->sortable()
27                 ->label('Created At'),
28         ])
29         ->filters([
30             //
31         ])
32         ->recordActions([
33             EditAction::make(),
34         ])
35     }
```

3. Ganti icon

```
filament-app > app > Filament > Resources > Users > UserResource.php > UserResource
11 use Filament\Resources\Resource;
12 use Filament\Tables\Table;
13 use Filament\Schemas\Schema;
14 use Filament\Support\Icons\Heroicon;
15 use Filament\Tables\Table;
16
17 class UserResource extends Resource
18 {
19     0 references
20     protected static ?string $model = User::class;
21
22     //protected static string|BackedEnum|null $navigationIcon = Heroicon::OutlinedRectangle;
23     0 references
24     protected static string|BackedEnum|null $navigationIcon = Heroicon::OutlinedUsers;
25
26     0 references
27     protected static ?string $recordTitleAttribute = 'name';
28
29     0 references | 0 overrides
30     public static function form(Schema $schema): Schema
31     {
32         return UserForm::configure($schema);
33     }
34
35     0 references | 0 overrides
36 }
```
